

Experiencing Symptoms of COVID-19?

Get a Rapid Antigen test now!

Results available in 15 to 30 minutes.

Stay onsite until your results are available.

If your test is positive:

COVID medications lower your risk of hospitalization and death.

- See a telehealth provider onsite for FREE within 15 minutes of receiving the test result.
- If the telehealth provider finds you are eligible for medications, you can take medications home with you today.

See the list below for what puts you at higher risk for hospitalization or death:

- | | | |
|--|---|--|
| <ul style="list-style-type: none">• Over 50 years of age• Diabetes• Pregnancy• Obesity• Smoking• Substance use disorders• Depression or Schizophrenia• Cancer• Disabilities or Chronic Diseases• Sickle Cell Disease• Thalassemia• Organ Transplant | <p>Heart problems including:</p> <ul style="list-style-type: none">• Heart failure• Coronary Artery Disease• High blood pressure <p>Kidney problems including:</p> <ul style="list-style-type: none">• Renal failure or dialysis <p>Liver problems including:</p> <ul style="list-style-type: none">• Cirrhosis <p>Neurologic problems including:</p> <ul style="list-style-type: none">• Prior stroke• Dementia | <p>Chronic lung disease including:</p> <ul style="list-style-type: none">• Asthma• COPD/emphysema• Blood clots in the lung• Pulmonary Hypertension• TB or prior lung injury• Cystic fibrosis <p>Immune system problems including:</p> <ul style="list-style-type: none">• HIV• Medications like steroids, chemotherapy |

If you leave the testing site before your test result is available:

Please return TODAY if you test POSITIVE. No appointment is necessary to return.

- Bring a list of your current medications.
- Contact your medical provider or an urgent care if the site has already closed.
