

# Thank You

On April 23, 2025, we will celebrate Administrative Professionals Day. Administrative professionals at Sutter County Health and Human Services (HHS) work across many functions, often wearing multiple hats, to help us manage the activities that keep HHS running. Their friendliness and professionalism make them the first point of contact for many clients, creating a welcoming environment. Our administrative professionals maintain client files and support systems, assist with financial and resource management, draft office reports and communications, and perform many other critical functions. Administrative professionals are absolutely essential for maintaining seamless day-to-day operations at HHS, ensuring we collectively achieve our mission to serve the community.

We are very fortunate to have some of the best administrative professionals here at HHS, and we celebrate and recognize them for their contributions every day. We encourage everyone to reach out to the administrative professionals who work with you to say thank you and send a note of appreciation. To all HHS administrative professionals: we thank you on behalf of all of HHS for all that you do to support our mission to serve our community.
