

Steven's Story (60 years old):

Steven was homeless over 20 years as a result of financial issues. He started to live on the streets and migrated towards the river for more comfort. He had previously come to Better Way but was not ready at that time. He agreed to come this time because he knew that his health was declining and needed to get help. Steven has worked closely with his case manager and has successfully started receiving Social Security benefits! This is the first time he has had income in 20 years. He is doing great at his household, where he has been since June 2024.
